SCHEDULE 1: THE PROJECT

Enhanced Traceability System: Description of the Project

The primary objective of the Enhanced Traceability system is to track every element of Cakesmith's operation from the delivery of ingredients, through the production process, up until the finished products leave their hands. The system must support the real time inputting of data through out the delivery, production and distribution process. The primary aim of this is to provide an unbroken thread of traceability of every product produced .The system must then provide valuable insights with regards to the efficiency of cakesmith's business at all operational levels.
